# NOVO MOBILE

NOVO SCADA

WIRELESS READING SYSTEM

Bluetooth communication module (WT-BTS) + Novo Mobile application.

Allows reading and calibration of industrial gas electronic meters, and live synchronization of all downloaded data from SCADA systems through cellular network.

Compatible with Eagle Research corp. systems.

WT-BTS

NOVO MOBILE

NOVO SCADA

SMARTPHONE & TABLETS COMPATIBLE.

Data visualization synchronized directly from SCADA NOVO.

Mobile Application (android) that allows a remote connection with EAGLE devices via Bluetooth aiming to perform the reading of current and historical data, alarms, control through Virtual Keypad , and carry out the calibration and configuration process in a more simple and efficient way.

It also allows the report generation with historical information (information charts or graphics), equipment configuration and the calibration process's results. The app has connectivity with the NOVO Server, that admits the inspection of the equipment from distance.

Bluetooth Connection. No more wires with EAGLE devices.

Ease and comfort when operating with EAGLE device.

Information could be consulted even if there is no connection to an EAGLE device.
